

Honors Peer-graded Assignment: Peer Reviewed Assignment

List the top three most important computer specifications you'll look for when shopping for a computer for this data scientist.

1. CPU processor

2. RAM

3. Hard drive sizes and types

When working for an employer, you'll gather comparative shopping quotes. As part of your recommendation, you would also consider shipping speed (how soon the computer would arrive) and warranty information.

Based on the available computing models available at Dell and Lenovo, I recommend that the company purchases from Dell because this company provides most customizable option for data scientist work. They have good support options for businesses worldwide and easy contactable.

In the following text field, please tell us about your experience with this Peer Reviewed Assignment. What knowledge did you gain that you didn't know before? What tasks would you add or change for this assignment?

It is hard to tell from this assignment as company purchase policies may vary in their requirements.
